# CREATE VISIBILITY
IMPROVE PREDICTABILITY
CONTROL RISK
MANAGE OUTCOMES

Level 1 Dashboards provide a centralized view of an entire project, allowing for quick insight into project performance and the ability to benchmark against key performance indicators.

DYNAMIC DASHBOARDS

RISKS & LESSONS LEARNED

RESOURCE UTILIZATION

TASK MANAGEMENT

COMPLETE PROCUREMENT COSTING

By combining ContinuumEdge's CCMS and PGMS, executives get a complete picture of every project they manage. Moreover, they trust the information in the reports because it comes directly from personnel on the job. No other Project Governance tool on the market has that capability.

Project Portfolio Management

Executives can organize multiple projects and gain big picture visibility while managing vital program intricacies, such as scope, schedule and budget.

Budget and Cost Oversight

Manage and forecast the financial success of all your existing programs. Drill into all financial metrics to gain insight into project activities.

Scheduling and Resource Utilization

Manage tasks, activities and gate reviews in order to finish on time. Workflow processes help guide activities and communications across all parties.

Document Control

Manage the documents and drawings review process, keep on top of RFIs, receive and approve submittals, and share files.

Change Management

Collaborate on changes, gaining early understanding of risks and issues. Create Lessons Learned from statistical trends to help mitigate program risks and costs.

Reporting and Analysis

Access forecasting and operational reporting for every business process within a program. Create dashboards for visual analysis of project details.

PGMS

# PROJECT GOVERNANCE MANAGEMENT SYSTEM

Project Summary Dashboards, Program and Portfolio Management, Gate Reviews, Audits and Analysis, Project and Performance Reporting, Realtime Data Collection.
Everything Management needs to plan, estimate, execute, and control project outcomes.

www.continuum-edge.com

How do you ensure the information you are viewing is accurate and up-to-date?

With CE PGMS, it's simple. View the right information, from the right groups, at the right time.
Binding ContinuumEdge's Suite of Applications, such as the Commissioning & Completions Management System (CCMS), to the PGMS allows management to roll up Level 5 data for any phase or discipline of a project.

Company Organization Charts *are dynamically built when logging in. Hierarchies provide a simple, organized view of Project Portfolios. Drill down from Business Unit to Project Type and Lifecycle, providing access to a dashboard on status, performance, budget and report publications.*

LEVELS

1 Dashboards and Business Reports
- Business Unit/Projects Lifecycle Dashboard
- Monthly Executive Reports
- Historical Analysis Reports

2 Analysis and Report Selection
- Validation of Data (Dashboard Population)
- Weekly/Monthly Report Publication
- Gate Reviews/Trending/Predictions
- Project Reviews & Definition Rating Reports

3 Planning and Data Entry
- WBS and MH Planning, Scheduling & Utilization
- Risks/Issues/Lessons Learned
- Collaboration - Contracts/RFIs
- Management of Change
- Procurement Estimating & Costing

4/5 Data Creation
- PGMS links to CE Suite of Applications (CCMS, SRMS, ODMS)
- Real-time, Non-manipulated Data
- Full Project Lifecycle Functionalities

Level 1 - Business Reporting

Business performance reporting, projects reporting (by lifecycle category), or division. Expose dashboard components, published reports and major issues providing Sr. management with leading KPIs (CPIs, SPIs, ETCs, EVs, etc.) and a toolkit to make informed decisions based on accurate level 3 data.

Level 2 - Project Governance

360° View of all projects and their health status. Select a project and enter in monthly reports, select dashboard data to be analyzed, and reported on. Report on all aspects of scope, schedule and budget items.

Based on PMP and CII standards and methodologies.

Level 3 - Project Management

Project execution and reporting. Single point of reference where project information is entered or reviewed down to WBS and asset levels. Each project contains WBS, scheduling, issues, milestones, risks, HSE indicators, lessons learned, incidents, near misses, packages, and materials. ALL are made available to higher levels of reporting.
